Idan Gilboa

Israel | idangilb@gmail.com | github.com/w0x7y | w0x7y.dev

Experience

Freelance Web Developer 2026 – Present

- Designed and hand-coded a website that sells and hosts a driving instructor's course (launching soon)

Junior Shelach Guides App 2026 – Present

- A free Hebrew app for iOS, Android and the web, for the program's guides, teachers and parents (pilot soon)
- Messages with priority levels that wait out the night and Shabbat, event waitlists, offline attendance, trips
- A teacher dashboard for plans to review, missing attendance and approvals; built with Expo and Supabase

Python and Web Development Tutor 2025 – Present

- Teach Python and web development basics to private students (12 so far)

Education

Ort Guttman High School 2022 – June 2028 (expected)

Majors: Computer Science, Cyber, Physics (5 units each) *Israel*

- 5-unit Mathematics and 5-unit English

Projects

KineVault Track | *TypeScript, Expo, Supabase*

- Building the whole iOS and Android nutrition and workout app, backend to UI design (in development)
- Offline search of 5,431 foods, barcode scanning, and daily calories, macros and water
- Live workouts with a rest timer and personal records, plus steps, weight and progress photos
- Companion to KineVault, my teammate's 3D exercise video app, with one account for both

gentooinstall | *Bash, Linux*

- Designed a menu-driven Gentoo Linux installer like archinstall that follows the official Handbook
- Options: OpenRC or systemd, btrfs rollback snapshots, disk encryption and installing next to Windows

Revo Editor Tooling | *Rust, Tree-sitter, Zed*

- Built Revo's Zed extension, credited in the official docs: highlighting, plus completion, hover, diagnostics, go-to-definition, rename and formatting through Revo's language server
- Maintain the Tree-sitter grammar editors use to highlight Revo, building on doomy's original

Patternbook | *TypeScript, React, Tailwind*

- Nearly 400 copy-paste layout patterns in React + Tailwind and HTML + CSS, each with a brief for AI agents
- Published patternbook-mcp, an MCP server that lets coding agents fetch patterns; 500+ npm downloads

Just Tiers | *Java, Fabric*

- Shows a player's tier from PvPTiers, PvPHQ, SubTiers or NovaTiers in Minecraft, with per-site toggles, custom badges and player lookup; 1,500+ Modrinth downloads

better-sql.nvim | *Lua, Python, PostgreSQL*

- Run SQL, browse schemas and edit table rows in PostgreSQL from Neovim, with filters, sorting and CSV export

Open Source | *JavaScript, Zig*

- Merged bug fixes and speedups into Revo's built-in Zig formatter, bringing its output closer to clang-format
- Merged form features (radio buttons, multi-selects) and fixes into stab, a small frontend framework

Volunteering

Latet 2025 – 2026

- Holiday donation drives at a mall, asking shoppers to buy items and donate them to families in need

Media Tech Netanya 2024 – Present

- Organize the library's books every week

Technical Skills

Languages: TypeScript, JavaScript, Python, C#, Go, Java, Rust, Lua, Bash
Tools: React, Expo, Tailwind, Supabase, PostgreSQL, SQLite, Tree-sitter, Git, GitHub Actions, Linux
AI-assisted development: use AI coding agents to review code, create first drafts and sometimes write code
Spoken languages: Hebrew (native), English (very good). **Interests:** Muay Thai, BJJ, MMA (since 2022)
